Board of Education:

I am writing today to express my gratitude for the Board supporting AB 906 which would provide much needed support to "juvenile court and community schools". It is important to recognize that community schools service justice-involved students, and this critical population will benefit more than anyone from high quality credit-recovery, vocational training, and general high school education programming. Research shows that such programming discourages future delinquency and justice involvement. So, a big thank you for supporting this bill.

Secondarily, I am also writing to thank Youth Commission Liaison Seth Weinfield for his commitment to your board and for his service. Having worked with Seth on the Youth Commission, his dedication to educational equity and his fellow students is clear.

Thank you so much!
