Special Education Transportation

Safe, dependable, economical and environmentally responsible transportation between home and school shall be provided for pupils in special education classes and programs operated by the Office. This service shall be provided on a consistent morning and afternoon route basis with no variance in either home to school or school to home delivery other than for respite cases.

By special arrangement in respite cases, the delivery point may be designated as different from the pick-up point as long as this is a regular and consistent daily arrangement and is within the geographic boundaries of San Mateo County.

Adopted SMCBE 06/07/78; Revised 07/07/82, 07/01/87, 02/18/09
