## SMCOE and Local Education Agency Information and Computing Environment

### 1) SMCOE

SMCOE provides vital resources to support the county's twenty-three school districts. The total number of student enrollment for all the K-12 schools within the county of San Mateo is around 80,000. The total number of employees for the County is about 16,000, including substitutes.

### 2) SMCOE Computing and Support Environment

SMCOE's "Integrated Technology Services" (ITS) manages and maintains the systems, servers, networks, and computers for the county office. They also provide contracted and consulting services to districts to support and maintain their technology infrastructure.

SMCOE maintains and supports the organization's Enterprise Resource Planning software installations which includes implementation and upgrade management, database monitoring, security and access management, state and federal regulatory reporting, data analysis, report configuration, system configuration, training, and all other system or data requirement as determined by the organizations.

### 3) Integrated Technology Services (ITS)

- a. Desktop Hardware – ITS supports and maintains thousands of desktop computers from fully configured PC, MACs, Chromebooks, Dell Laptops to VM clients. They also support thousands of mobile devices including IPHONES, IPADS, Androids and portable hotspots. ITS supports hundreds of printing devices located throughout the county. Our desktop environment consists primarily of Microsoft Windows 10/11 and Mac OS 12/13.
- b. Networks – ITS maintains an extensive network to all districts that we serve. Fiber Networks – ITS supports and maintains an extensive network to all districts that we serve. Fiber is used to provide connectivity for various projects. ITS also provides connectivity through VPN, VDI and other remote connectivity means. Wireless connectivity for Staff, Student and Guest access is also installed at various locations.
- c. Servers – ITS supports and maintains an extensive array of servers, mostly virtual and some physical. The ITS Department's virtual environment runs on ISCSI SAN storage utilizing a clustered VMWare environment. Our dedicated Datacenter is designed to accommodate any server solution needed. We host email services, network monitoring systems, system management services, database servers, student system applications and much more. SMCOE uses Active Directory LDAP, SQL databases and Exchange for email. Our backup solution is Cohesity with both on-prem and cloud backups. Our Network infrastructure runs in a Juniper switched Datacenter with 100 GB backbone. We run our virtual environment in VMware and use Palo Alto

firewall. We have multiple WAN Links to the Cenic K12 State Network for our primary WAN connection.

#### 4) District Business Services (DBS)

DBS maintains and supports through the ERP system, Financial, Human Resources, Payroll, Accounts Payable, Credential, General Ledger, Budgeting, Purchasing and other subsystems. System upgrades and configurations are also coordinated.

- a. Federal and State Mandated Submissions – DBS provides the processing of all federal and state mandated submissions from W-2's and 1095's to 1099's. DE542, DE9 and EEOC reports are also processed on a regular basis.
- b. Payroll and A/P Checks – All Payroll and A/P checks are processed at specified intervals for both the county office as well as for each district.
- c. Reporting Services – DBS provides reporting services to all departments and divisions within the organization and also design complex report output. Complex database analysis is performed to provide the organization with specific information not normally found within standard reports.
- d. Training – In-depth training and support are provided for each subsystem within the ERP application in both classroom and one-to-one settings.
