

Working with the School Program

Remember, your student's education requires your involvement.

If, as a result of the IEP team meeting, your student has been recommended for placement in a special program, you are encouraged to visit the program prior to the placement and/or signing the IEP. District personnel will assist you in arranging a site visit.

Please keep in mind that the schools do care about your student and try very hard to provide a high quality, effective program. Your cooperation, understanding, and support are important.

At times, both the school staff and parents/guardians need to recognize constraints such as geography, limited resources, time restrictions, etc., but given reasonableness by all, and working together the best solution can be found.
