

Schools are Safe Places

How are schools keeping their campuses safe for all students to learn during the COVID-19 pandemic?

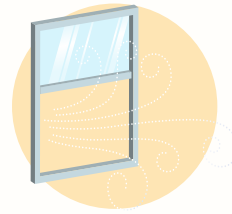

Vaccine

The vaccine is a safe and effective way to get back to doing what you enjoy most.

Masks

Masks keep the virus from spreading in the air from one person to another.

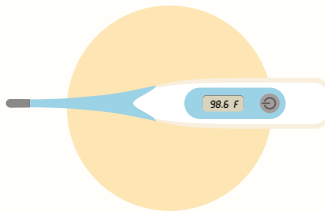

Ventilation

Good airflow helps keep virus particles from concentrating inside.

Handwashing

Washing your hands regularly helps prevent the spread of COVID-19.

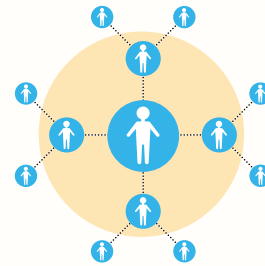

Self-Monitoring

If you are sick, stay home from school and follow school policies for returning to school.

Testing

COVID-19 testing detects the virus even before you start to feel sick.

Contact Tracing

You will be notified if you are a close contact of someone who tested positive for COVID-19.

Remember to follow any additional protocols set by your school or district.
